173\_K - AKCALI SPRAY SYNTHETIC PAINT FOR SPOILER

Revision No: 4 Revision Date: 04/02/2025 Printed on: 24/04/2025 Page No: 2/17 Replaced Revision: 3

Any additional information concerning the risks for health and/or the environment are given in sections 11 and 12 of this sheet.

| Hazard classification and indication:                        | H222 | Extremely flammable aerosol.                |
|--|------|---|
| Aerosol, category 1  | H229 | Pressurized container: may burst if heated. |
| Eye irritation, category 2                                   | H319 | Causes serious eye irritation.              |
| Skin irritation, category 2                                  | H315 | Causes skin irritation.                     |
| Specific target organ toxicity - single exposure, category 3 | H336 | May cause drowsiness or dizziness.          |

#### 2.2. Label elements

Hazard labelling pursuant to EC Regulation 1272/2008 (CLP) and subsequent amendments and supplements.

Hazard pictograms:

| Signal words:            | Danger   |
|--------------------------|--|
| Hazard statements:       |  |
| H222                     | Extremely flammable aerosol.   |
| H229                     | Pressurized container: may burst if heated.  |
| H319                     | Causes serious eye irritation.   |
| H315                     | Causes skin irritation.  |
| H336                     | May cause drowsiness or dizziness.   |
| Precautionary statements | :  |
| P210                     | Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. |
| P251                     | Do not pierce or burn, even after use.   |
| P410+P412                | Protect from sunlight. Do not expose to temperatures above 50°C / 122°F.                       |
| P501                     | Dispose of the product / container in accordance with local regulations.                       |

The full wording of hazard (H) phrases is given in section 16 of the sheet.

The product is an aerosol containing propellants. For the purposes of calculation of the health hazards, propellants are not considered (unless they have health hazards). The percentages indicated are inclusive of the propellants.

Percentage of propellants: 32,00 %

### **SECTION 4. First aid measures**

### 4.1. Description of first aid measures

In case of doubt or in the presence of symptoms contact a doctor and show him this document.

1 ≤ x < 3

In case of more severe symptoms, ask for immediate medical aid.

EYES: Remove, if present, contact lenses if the situation allows you to do so easily. Wash immediately with plenty of water for at least 15 minutes, opening the eyelids fully. Get medical advice/attention.

SKIN: Take off contaminated clothing. Wash immediately and thoroughly with running water (and soap if possible). Get medical advice. Avoid further contact with contaminated clothing.

INGESTION: Do not induce vomiting unless explicitly authorised by a doctor. Do not give anything by mouth to an unconscious person. Get medical advice/attention.

INHALATION: Remove victim to fresh air, away from the accident scene. In the event of respiratory symptoms (coughing, wheezing, breathing difficulty, asthma) keep the victim in a comfortable position for breathing. If necessary administer oxygen. If the subject stops breathing, administer artificial respiration. Get medical advice/attention.

#### Rescuer protection

It is good practice for rescuers lending support to a person who has been exposed to a chemical substance or to a mixture to wear personal protective equipment. The nature of such protection depends on the hazard level of the substance or mixture, on the type of exposure and on the extent of the contamination. In the absence of other more specific indications, use of disposable gloves in the event of possible contact with body fluids is recommended. For the type of PPE suitable for the characteristics of the substance or mixture, see section 8.

#### 4.2. Most important symptoms and effects, both acute and delayed

Specific information on symptoms and effects caused by the product are unknown.

DELAYED EFFECTS: Based on the information currently available, there are no known cases of delayed effects following exposure to this product.

#### 4.3. Indication of any immediate medical attention and special treatment needed

If you feel unwell, contact a POISON CENTER / doctor.

Means to have available in the workplace for specific and immediate treatment

Running water for skin and eye wash.

### **SECTION 5. Firefighting measures**

Revision No: 4 Revision Date: 04/02/2025 Printed on: 24/04/2025 Page No: 5/17

Replaced Revision: 3

# 173\_K - AKCALI SPRAY SYNTHETIC PAINT FOR SPOILER

5.1. Extinguishing media

SUITABLE EXTINGUISHING EQUIPMENT The extinguishing equipment should be of the conventional kind: carbon dioxide, foam, powder and water spray. UNSUITABLE EXTINGUISHING EQUIPMENT None in particular.

#### 5.2. Special hazards arising from the substance or mixture

HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE If overheated, aerosol cans can deform, explode and be propelled considerable distances. Put a protective helmet on before approaching the fire. Do not breathe combustion products.

#### 5.3. Advice for firefighters

GENERAL INFORMATION

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear.

SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

### **SECTION 6.** Accidental release measures

#### 6.1. Personal precautions, protective equipment and emergency procedures

Eliminate all sources of ignition (cigarettes, flames, sparks, etc.) from the leakage site. Send away individuals who are not suitably equipped. Wear protective gloves / protective clothing / eye protection / face protection.

#### 6.2. Environmental precautions

Do not disperse in the environment.

#### 6.3. Methods and material for containment and cleaning up

Use inert absorbent material to soak up leaked product. Make sure the leakage site is well aired. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

#### 6.4. Reference to other sections

Any information on personal protection and disposal is given in sections 8 and 13.

### **SECTION 7. Handling and storage**

#### 7.1. Precautions for safe handling

Avoid bunching of electrostatic charges. Do not spray on flames or incandescent bodies. Vapours may catch fire and an explosion may occur; vapour accumulation is therefore to be avoided by leaving windows and doors open and ensuring good cross ventilation. Do not eat, drink or smoke during use. Do not breathe spray.

#### 7.2. Conditions for safe storage, including any incompatibilities

Store in a place where adequate ventilation is ensured, away from direct sunlight at a temperature below 50°C / 122°F, away from any combustion sources.

| SECTION 10. Stability and rea   | activity  |  |                      |  |  |
| I0.1. Reactivity  |   |  |                      |  |  |
| There are no particular risks of reaction with  | other substances in normal co   | onditions of use.  |                      |  |  |
| ACETONE   |   |  |                      |  |  |
| Decomposes under the effect of heat.  |   |  |                      |  |  |
| 0.2. Chemical stability   |   |  |                      |  |  |
| The product is stable in normal conditions of   | use and storage.  |  |                      |  |  |
| 0.3. Possibility of hazardous reactions   |   |  |                      |  |  |
| No hazardous reactions are foreseeable in n   | ormal conditions of use and s   | torage.  |                      |  |  |
| ACETONE   |   |  |                      |  |  |
| Risk of explosion on contact with: bromine trifluoride, fluorine dioxide, hydrogen peroxide, nitrosyl chloride,2-methyl-1,3 butadiene, nitromethane, nitrosyl erchlorate. May react dangerously with: potassium tert-butoxide, alkaline hydroxides, bromine, bromoform, isoprene, sodium, sulphur dioxide, chromium rioxide, chromyl chloride, nitric acid, chloroform, peroxymonosulphuric acid, phosphoryl oxychloride, chromosulphuric acid, fluorine, strong oxidising gents, strong reducing agents. Develops flammable gas on contact with: nitrosyl perchlorate. |   |  |                      |  |  |
| 10.4. Conditions to avoid   |   |  |                      |  |  |
| void overheating.   |   |  |                      |  |  |

ACETONE

# 173\_K - AKCALI SPRAY SYNTHETIC PAINT FOR SPOILER

Revision No: 4 Revision Date: 04/02/2025 Printed on: 24/04/2025 Page No: 10/17 Replaced Revision: 3

#### Avoid exposure to: sources of heat, naked flames.

#### 10.5. Incompatible materials

Strong reducing or oxidising agents, strong acids or alkalis, hot material.

#### ACETONE

Incompatible with: acids, oxidising substances.

#### 10.6. Hazardous decomposition products

ACETONE

May develop: ketenes, Irritant substances.

### **SECTION 11. Toxicological information**

In the absence of experimental data for the product itself, health hazards are evaluated according to the properties of the substances it contains, using the criteria specified in the applicable regulation for classification. It is therefore necessary to take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological effects of exposure to the product.

#### 11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008

Metabolism, toxicokinetics, mechanism of action and other information

Information not available

Information on likely routes of exposure

Information not available

Delayed and immediate effects as well as chronic effects from short and long-term exposure

Information not available

Interactive effects

Information not available

#### ACUTE TOXICITY

ATE (Inhalation - vapours) of the mixture: ATE (Inhalation - gas) of the mixture: ATE (Oral) of the mixture: ATE (Dermal) of the mixture:

ACETONE LD50 (Dermal): LD50 (Oral): LC50 (Inhalation vapours):

XYLENE, MIXTURE OF ISOMERS

Not classified (no significant component) Not classified (no significant component) Not classified (no significant component) Not classified (no significant component)

> 15800 mg/kg Coniglio 5800 mg/kg Ratto 76 mg/l/4h Ratto

5000 mg/kg

> 5000 mg/kg Coniglio

13000 mg/kg Ratto

Page No: 11/17 Replaced Revision: 3

1100 mg/kg estimate from table 3.1.2 of Annex I of the CLP

(figure used for calculation of the acute toxicity estimate of the mixture)

ATE (Dermal):

LD50 (Oral):

DIMETHYL CARBONATE LD50 (Dermal): LD50 (Oral):

SKIN CORROSION / IRRITATION

Causes skin irritation

SERIOUS EYE DAMAGE / IRRITATION

Causes serious eye irritation

#### RESPIRATORY OR SKIN SENSITISATION

Does not meet the classification criteria for this hazard class

#### GERM CELL MUTAGENICITY

Does not meet the classification criteria for this hazard class

#### CARCINOGENICITY

Does not meet the classification criteria for this hazard class

REPRODUCTIVE TOXICITY

Does not meet the classification criteria for this hazard class

STOT - SINGLE EXPOSURE

May cause drowsiness or dizziness

#### STOT - REPEATED EXPOSURE

Does not meet the classification criteria for this hazard class

#### ASPIRATION HAZARD

Excluded because the aerosol does not allow the accumulation of a significant amount of product in the mouth

#### 11.2. Information on other hazards

Based on the available data, the product does not contain substances listed in the main European lists of potential or suspected endocrine disruptors with human health effects under evaluation.

### **SECTION 12. Ecological information**

Use this product according to good working practices. Avoid littering. Inform the competent authorities, should the product reach waterways or contaminate soil or vegetation.

evaluated according to applicable regulations.

Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations.

Waste transportation may be subject to ADR restrictions.

The management of waste arising from the use or dispersal of this product must be organised in accordance with occupational safety regulations. See section 8 for possible need for PPE. CONTAMINATED PACKAGING

Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.

The information contained in the present sheet are based on our own knowledge on the date of the last version. Users must verify the suitability and thoroughness of provided information according to each specific use of the product. This document must not be regarded as a guarantee on any specific product property.

The use of this product is not subject to our direct control; therefore, users must, under their own responsibility, comply with the current health and safety laws and regulations. The producer is relieved from any liability arising from improper uses.

Provide appointed staff with adequate training on how to use chemical products.

CALCULATION METHODS FOR CLASSIFICATION

Chemical and physical hazards: Product classification derives from criteria established by the CLP Regulation, Annex I, Part 2. The data for evaluation of chemical-physical properties are reported in section 9.

Health hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 3, unless determined otherwise in Section 11. Environmental hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 4, unless determined otherwise in Section 12.
